

YNSEED PROJECT NEWSLETTER #1

Youth new personal & employable skills development

Digital & media literacy, Artificial Intelligence & Sustainable Development

Put goal is to provide critical skills of using the Internet and other skills that are nowadays compulsory for an active and responsible digital citizen. Through YNSPEED project we will address 3 hot topics of the nowadays digital era such us: fake news, artificial intelligence and education for a sustainable development + a continuous interesting & useful topic as learning English, this time by using technologies.

Through the project will be implemented a MOOC platform for courses addressing (critical) digital & media literacy (Fake News), Artificial Intelligence, Sustainable Development and Learning English with Technology.

of the European Union

YNSPEED
Youth new personal &
employable skills development

YNSPEED?

The YNSPEED project aims to address open and innovative practices for informal learning through which the young people from 5 partner countries in the project are aware of the earning process and develop specific skills that will improve their employment skills such as: critical thinking about fake news, approach and education for sustainable development using digital platforms, tools and materials.

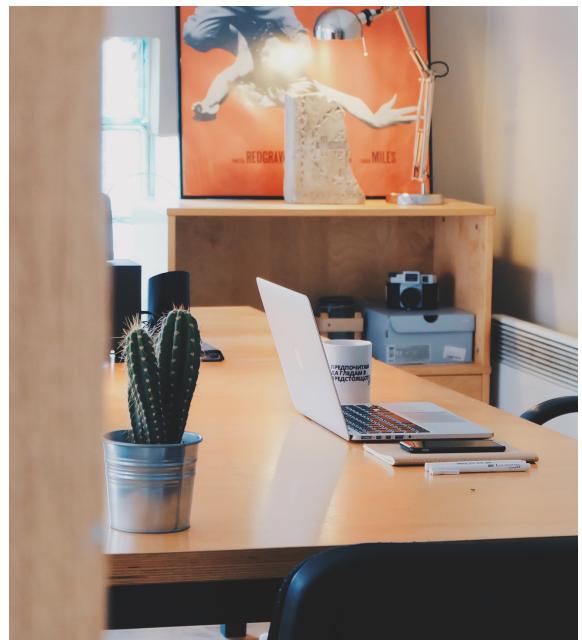

Specific objectives:

1. To equip the youth workers and the disadvantaged youth from the 5 communities involved in the project with knowledge relevant to their professional and personal life and to improve their employable skills, over a period of 24 months.
2. To prepare the young people from the 5 communities of the project consortium for lifelong learning, involving them in a process of operationalizing the critical thinking skills regarding fake news, addressing artificial intelligence and education for sustainable development in the a digital company for a period of 24 months.
3. To design and validate training tools and materials that promote innovation in learning (ie LET course) with flexible approaches (ie MOOC) that will be used within the partnership for direct target groups - youth workers and youth in disadvantaged areas from those 5 communities involved in the project, over a period of 24 months.

What results are expected during the project and on its completion?

As concrete results, the project will produce:

- An online platform suitable for running MOOC courses + 4 MOOC courses (developed under CC licences, using partially OER resources)
- 5 Multiplier dissemination events in each country
- 2 short training courses for youth's workers + a youth's learning strategy

FINAL OUTCOMES:

MOOC courses:

- **Fake news course**
- **Artificial Intelligence**
- **Education for Sustainable Development**
- **Learning English with Technology**
